

Dear Friends,

As the year comes to an end, we are still astonished and often comment to each other about how much God has done in Nurmay since January. We have been married for 10 months, but it's amazing what God has done in that time!

We are thankful for God's provision to purchase the land in Gotani and start the construction of the missionary training center. As missionaries, we live by faith every day, so we asked ourselves, "Why not start the construction by faith too?" There have been some pauses along the way, but we continue to believe in the vision and know that God will provide by touching hearts to partner with us in seeing this vision come to pass!

We have started construction on the first building- a duplex, one side being our house and the other side a guest house and temporary classroom. We decided to start with our house, so that the money that we currently spend on rent can be used for future construction. Also, we need to be on-site to oversee the construction and right now we are living about 90 minutes from Gotani, so spend quite a lot of time on the road.

We are thankful that through the generous giving of our friends and family we were able to buy 1959 bricks. This has given us a very good start on the building. We need about 5000 more bricks to finish both sides of the duplex. Each brick is over one foot long and costs only 74 cents. Would you be willing to donate a brick or two to see the construction continue? We have set up a website on Youcaring, <http://www.youcaring.com/other/Missionary-Training-Center-Kenya-PHASE-1-BRICKS/33709> so it is very quick and easy to donate using Paypal or a credit card.

Donate a brick and be a part of training Africans for the harvest. You can also donate your time and talents- we already have a plumber who has offered his services to this project. Let us know if you have construction gifts or talents that you would like to share!

Serving Him,

Abel and Christa Muanica
Nurmay Missions
